2. THE BUYBACK PROPOSAL

2.1 Overview

The Responsible Entity is seeking to obtain Securityholder approval so that it has the flexibility to undertake buybacks during the 12-month period from 4 April 2025, should market conditions support this. The Responsible Entity believes that such flexibility will support the Fund's goals of achieving the most efficient capital structure possible, and optimising returns to Securityholders. Funding for the Buyback will be sourced from existing cash balances and implementation of the Fund's announced asset sale program.

If Securityholders approve the Buyback, the Fund will be permitted to buy back a maximum of 25% of the number of Stapled Securities that the Fund has on issue as at the close of trade on 2 April 2025 over the 12 months following that date, unless terminated earlier by the Responsible Entity.

The proposed Buyback will (if approved) be conducted in accordance with the URF I Constitution and the URF II Constitution, section 601KH of the Corporations Act (as inserted by ASIC Legislative Instrument 2016/1159) and the ASX Listing Rules.

2.2 Purpose of the Resolution

The purpose of the Resolution is to seek Securityholder approval to refresh and extend the on-market buyback program. Under section 601KH(8)(a) of the Corporations Act (as inserted by ASIC Legislative Instrument 2016/1159), the Fund must obtain the approval of its Securityholders in order to buyback more than 10% of the smallest number of votes attaching to the voting Stapled Securities that the Fund had on issue during the 12 months preceding the buyback (**10/12 Limit**).

The Resolution is an ordinary resolution and will be approved if more than 50% of votes cast at the Meeting on the resolution are in favour of the resolution.

If approval is given, the Fund will be able to implement the Buyback on the terms outlined in this Explanatory Memorandum.

If approval is not given, the Fund may continue to buyback Stapled Securities within the 10/12 Limit, which does not require Securityholder approval. It is not guaranteed that the Responsible Entity would buy back the maximum number of Stapled Securities permitted under the 10/12 Limit.

2.3 Reasons for the Buyback

The Responsible Entity considers that an on-market buyback is an effective means of returning any surplus capital to Securityholders and will enable the Fund to maintain an efficient capital structure.

As long as the on-market discount of Stapled Securities remains at a discount to their underlying value, the Responsible Entity believes that returning capital in the form of buybacks may be accretive

for Securityholders as it could increase the Stapled Securities' value to the benefit of continuing Securityholders and provide liquidity to investors who sell into the Buyback.

The Responsible Entity also considers that an on-market buyback provides the Fund with flexibility to adjust the volume of Stapled Securities bought back or suspend or terminate the Buyback at any time, depending on market conditions, and utilize the alternative methods of returning capital through a pro rata distribution of capital to all Securityholders or an off-market buyback.

2.4 Outline of on-market buybacks

An on-market buyback involves the Responsible Entity, on behalf of the Fund, buying Stapled Securities in the ordinary course of trading on the ASX, in the same way as any other market transaction. It is a requirement of the Corporations Act that the Responsible Entity must not buyback Stapled Securities on-market by way of a special crossing or priority crossing.

The implementation of an on-market buyback is regulated by both ASIC and the ASX. In particular, the ASX Listing Rules prescribe that the buyback price must not be more than 5% above the volume weighted average price (**VWAP**) for Stapled Securities in the Fund over the previous 5 days on which sales in the Stapled Securities were recorded before the date on which a buyback was made.

The closing price of the Fund's Stapled Securities on the ASX on 4 March 2025 was \$0.415. The highest and lowest market prices and the average monthly closing prices of the Stapled Securities on the ASX to 4 March 2025 were as follows:

Period	Low (\$)	High (\$)	Average Closing Price (\$)
March 2025 [^]	0.400	0.415	0.408
February 2025	0.400	0.415	0.408
January 2025	0.355	0.420	0.380
December 2024	0.355	0.375	0.360
November 2024	0.335	0.370	0.345
October 2024	0.340	0.360	0.348
September 2024	0.305	0.350	0.327
August 2024	0.300	0.325	0.314
July 2024	0.278	0.315	0.289
June 2024	0.275	0.295	0.286
May 2024	0.265	0.300	0.283
April 2024	0.255	0.275	0.266
March 2024	0.265	0.298	0.276

[^] to close of business on 4 March 2025. Source: Bloomberg and ASX.

The Fund must announce on the ASX the period during which Stapled Securities may be bought back (if the Responsible Entity has determined this), the maximum number of Stapled Securities intended to be bought back and any other information that affects a Securityholder's decision to sell Stapled Securities. The Fund also has to give daily notices containing details of the Stapled Securities bought back.

All Securityholders are eligible to participate by selling their Stapled Securities to the Fund on the ASX. Participation in any Buyback is voluntary. Securityholders do not have to sell their Stapled Securities if they do not want to. Securityholders will not, however, have the right to withdraw sales once made.

If the Resolution is approved by the Securityholders, the maximum number of Stapled Securities that the Responsible Entity, on behalf of the Fund, will be able to buy back on-market during the 12-month period commencing on 4 April 2025 will be an amount equal to 25% of the issued Stapled Securities in the Fund as at the close of trade on 2 April 2025. As of 4 March 2025, there are now 690,882,004 Stapled Securities on issue. Assuming there are no issues or buybacks of Stapled Securities between 5 March 2025 and the date of the Meeting, the number of Stapled Securities bought back (if approved) could be up to 172,720,501 Stapled Securities.

Since an on-market buyback involves Stapled Securities being acquired at the market price of Stapled Securities at that time, it is not possible to anticipate the total actual amount the Responsible Entity, on behalf of the Fund, will expend on buying back Stapled Securities. If the Resolution is approved by the Securityholders, it is not guaranteed that the Responsible Entity will buy back the maximum number of Stapled Securities permitted under the Buyback or any Stapled Securities at all.

Financial implications of the buyback program

The Buyback will be funded from the Fund's available cash reserves.

The Responsible Entity, on behalf of the Fund, has determined that the Buyback will not materially prejudice the Fund's ability to pay creditors and will retest that assessment at the time each Buyback occurs.

As of 31 December 2024, the Fund has approximately A\$83 million of cash on its balance sheet available for all corporate purposes, including funding the Buyback. Drawing on the available cash reserves will deplete the remaining cash reserves available following the Buyback. The Fund continues with its asset sales program, and the proceeds of any completed sales (net of required debt repayments) will be available to add to the potential buyback reserve.

The exact impact on earnings per Stapled Security of any Buyback cannot be determined until the Buyback is completed and will depend on the number of Stapled Securities bought back, the volume-weighted average buyback price and how the Buyback program is funded.

Effect on control of the Fund

If the Buyback is fully implemented over the 12 months to April 2026 (which is not certain) and there are no new issues of Stapled Securities, it would reduce the number of Stapled Securities on issue by 25% and proportionately increase the voting power of investors who retain their Stapled Securities. For example, an existing holding of 10% of Stapled Securities would increase to approximately 13% of the reduced number of Stapled Securities.

2.5 Responsible Entity Recommendation

The Responsible Entity recommends that Securityholders vote in favour of the Resolution.

Having regard to all relevant circumstances, including the matters set out in this Explanatory Memorandum and Notice of Meeting, the Directors of the Responsible Entity recommend that Securityholders vote in favour of the Resolution.

The Chair of the Meeting intends to vote undirected proxies in favour of the resolution to approve the Buyback.

3. CONSIDERATIONS RELEVANT TO YOUR VOTE

3.1 WHY SECURITYHOLDERS MAY VOTE FOR

The general advantages of the Buyback include the following:

- Enhances the ability for the Fund to return surplus capital in a manner that may be accretive to future earnings per Stapled Security;
- Enhances liquidity for Securityholders to sell Stapled Securities back to the Fund, where that liquidity may not be otherwise available to Securityholders;
- Allows continuing Securityholders to control a larger proportion of the Stapled Securities on issue; and
- The Responsible Entity has complete flexibility to adjust the volume of Stapled Securities bought and can suspend or terminate the Buyback at any time depending on the market conditions.

3.2 WHY SECURITYHOLDERS MAY VOTE AGAINST

However, in deciding how to vote, Securityholders should be aware that, among other things, some of the disadvantages of the Buyback include:

- The Buyback will reduce the Fund's cash balances and reserves, which may be needed for ongoing operations in the event the Fund is unable to generate liquidity through property sales;
- While the Buyback may provide some liquidity in the Fund's Stapled Securities in the short term, they will likely result in reducing the liquidity in the Fund's Stapled Securities in the long term due to a smaller number of Stapled Securities on issue for trading;
- Because the Responsible Entity will only buy back Stapled Securities at prices that are accretive to the Fund, Securityholders who sell their Stapled Securities on market as part of the Buyback may exit their investment at a price below their underlying value per Stapled Security, so there is a risk that in accessing liquidity provided through the Buyback, they might receive less than if they continued to hold their Stapled Securities; and
- Participation in the Buyback may have financial, taxation, or other ramifications for Securityholders depending upon each Securityholder's personal circumstances. The Responsible Entity recommends each Securityholder should obtain their own professional advice.

4. VOTING AT THE MEETING

VOTING

The Notice of Meeting and proxy form are attached as Appendix 1 to this Explanatory Memorandum. Please refer to the Notice of Meeting for information on how to vote. The Record Date for voting is 7:00pm 1 April 2025. All proxy forms must be received by 11:00am on 1 April 2025 in order to be valid. The Meeting will be held at 11:00am on 3 April 2025.

In accordance with section 252S of the Corporations Act, the Responsible Entity has appointed Stuart Nisbett, Independent Chair of the Responsible Entity, to chair the Meeting. The decision of the Chair on any matter relating to the conduct of the Meeting is final.

The quorum for the Meeting is at least two Securityholders present in person or by proxy together holding at least 10% of the Stapled Securities. If a quorum is not present within 15 minutes of the scheduled time for the Meeting, the Meeting may be adjourned to such time and place as the Responsible Entity decides, and at the adjourned meeting those Securityholders present in person or by proxy will constitute a quorum.

The Meeting will be held in person at the address stated in the Notice of Meeting. All Securityholders will have a reasonable opportunity to participate in the Meeting. Voting can be conducted in the ways stated in the Notice of Meeting – in person, by proxy, as authorised representative of a corporate Stapled Securityholder.

Only holders of Stapled Securities in the Fund will be permitted to attend the Meeting and to vote. Also, if the Responsible Entity or its associates were considered to have an interest in the Resolution other than as a member, they would be excluded from voting, and if they voted their votes would be disregarded.

Please refer to the Notice of Meeting for information on how to vote and attend the Meeting in person.

5. OTHER MATERIAL INFORMATION

At 4 March 2025, the Fund had 690,882,004 Stapled Securities on issue.

5.1 Related parties' right to participate in the Buyback

The Directors of the Responsible Entity have the following interests in the Fund at the date of this Notice of Meeting:

Name	Securityholding	% Voting Interest
Stuart Nisbett	18,462	0.003%
Peter Shear	0	0.00%
Jack Lowenstein	0	0.00%
Sean Banchik	0	0.00%

The following table shows the relevant voting interest that each Director of the Responsible Entity would have if the Fund bought back 25% of the issued Stapled Securities permitted under any approval of the Buyback given and if the Directors of the Responsible Entity did not sell any of their Stapled Securities:

Name	Securityholding	% Voting Interest
Stuart Nisbett	18,462	0.004%
Peter Shear	0	0.00%
Jack Lowenstein	0	0.00%
Sean Banchik	0	0.00%

The Directors of the Responsible Entity may participate in the Buyback programme.

Section 601LC of the Corporations Act prohibits the Responsible Entity from giving a financial benefit out of the Fund's property to the Responsible Entity or a 'related party' (as defined under the Corporations Act) of the Responsible Entity without the approval by resolution of Securityholders. However, such an approval by Securityholders is not required if the giving of the financial benefit is on arm's length terms under section 210 of the Corporations Act.

The Responsible Entity considers that if the Directors or the Responsible Entity's associates were to sell their Stapled Securities into the proposed Buyback, those sales would fall within the 'arms' length' exception as:

- the related parties who wish to participate in the Buyback would only be entitled to sell their Stapled Securities on the same terms as those that apply to other Securityholders;
- when the Responsible Entity enters a bid to buy Stapled Securities on market it does not know the identity of the seller and the price discovery process occurs on market; and
- the effect of the sales of those Stapled Securities on the Fund and the price is the same no matter who is selling the Stapled Securities.

5.2 Tax Implications

Approval of the resolution will not result in any tax implications for Securityholders if they do not sell their Stapled Securities. However, if a Securityholder chooses to participate in the Buyback by selling their Stapled Securities then that Securityholder should obtain specific tax advice on the treatment of the sale of their Stapled Securities taking into account their particular circumstances.

For Australian resident taxpayers holding their investment on capital account, a capital loss will arise if the disposal proceeds are less than the capital gains tax reduced cost base and a capital gain will arise if the disposal proceeds are more than the capital gains tax cost base. Capital losses can be used to net down capital gains made by the taxpayer in the current or future income years. Australian resident individuals, trusts or complying superannuation funds may be entitled to a capital gains tax discount on capital gains if the Stapled Securities were held for more than 12 months. Investors should seek professional advice on the treatment of the sale of Stapled Securities taking into account their particular circumstances.

The Responsible Entity and its associates currently hold 18,462 Stapled Securities representing 0.003% of the issued Stapled Securities.
